Findings

No active findings detected.

Positive Controls

DNS Protections

✓ **DMARC policy detected**

This helps reduce email spoofing and protects domain reputation.

✓ **SPF policy detected**

This helps receiving mail systems verify which servers may send email for the domain.

HTTP Security Controls

✓ **HSTS header detected**

This helps force browsers to use encrypted HTTPS connections and reduces downgrade risk.

✓ **Permissions-Policy header detected**

This limits browser features that pages are allowed to use, reducing unnecessary client-side exposure.

✓ **Referrer-Policy header detected**

This reduces accidental leakage of sensitive URL information to third-party sites.

✓ **X-Content-Type-Options header detected**

This helps prevent browsers from guessing file types in unsafe ways.

✓ **X-Frame-Options header detected**

This helps reduce clickjacking risk by limiting whether the site can be embedded in frames.

✓ **HTTPS is in use**

This confirms encrypted transport is available for visitors and protects data in transit.

TLS Protections

✓ **Requested hostname is covered by certificate SANs**

This confirms the TLS certificate matches the requested hostname.

✓ **TLS certificate is not near expiry**

This reduces the risk of service disruption from an expired certificate.

✓ **Modern TLS protocol negotiated**

This confirms the site supports modern encrypted connection standards.
